☎:+91-9123860826

Summary of Qualifications:

- 4+ **Years** of Experience in Information Technology on Software Testing including Experience in **Manual Testing and Automation Testing in Selenium.**
- Having 2 **years** of experience in developing test scripts using automation tool **Selenium Web-driver** along with **Java & C#**.
- Experience of software testing's like **Functional testing, Smoke Testing and Regression-Testing**.
- Good Exposure to write Test Script by using **Page Object Model** and **Data driven** Framework.
- Having experience of driving test execution using the **Hybrid framework** and **cucumber framework**.
- Good Experience in developing the test scripts in Web Driver with **JUnit**, **TestNG**.
- Good Exposure on **Selenium Locators** like ID, Name, Class and-path.
- Experience in **Cross Browser testing** (Chrome and Firefox).
- Having Experience in **Data Driven Testing** using **APACHEPOI** Libraries.
- Good exposure on third party tool **AutoIT, Sikuli**.
- Worked on **Maven Projects.**
- Good Experience in Creating, modifying and enhancing both Manual Test cases and test scripts created in Selenium Web driver.
- Good experience on Software **Bug life cycle**.
- Having good interaction with Test Management and Defect Management tool with **TFS** and **ALM**.
- Knowledge on Creating and Scheduling Jobs in Continuous Integration tool like **Jenkins.**
- Good knowledge in all phases **STLC** and **SDLC**.
- Involved in Sprint, retrospective Meetings.
- Good Knowledge on **Java (Oops)**concepts.
- Knowledge on **Database** in **SQL**.
- Handling a specific module of the application in Current project Independently.
- A good team player with strong ability to learn and adapt new skills and makes efforts to do the work at hand and manage time effectively.

Experience:

- Currently working as Test Engineer in AVEVA solutions, Hyderabad since Dec 2019.
- Worked as Test Associate and Test Engineer in SVM Technologies PVT LTD since Aug 2016 to November 2019.

Educational Qualifications:

- Bachelor of technology in Electronics and Telecommunication Engineering From KEC (Affiliated to BPUT University), BBSR, Odisha with80%.
- Diploma in Electronics and Telecommunication Engineering From BSE, Odisha with 83.5%.
- Higher School Education from JH high School, Purusottampur, Odisha With 65%.

Skills:

- Software Testing : Manual and Automation
- Automation Tools : Selenium Web driver, Grid, Auto IT, Jenkin, Extent Report, Apache POI,C#
- Implemented Framework : Hybrid Framework, Cucumber
- Build Management Tool : Maven
- Test Management Tool : ALM
- Bug Tracking and Project Management Tool: TFS,ADO
- Operating System : Microsoft Windows Family
- Language : Java, SQL
- Database : MySQL
- Documentation Tool : Microsoft Word, Excell
- Browser : Google Chrome, Firefox

Project Summary:

Project#1:

Project Name : BOCAD & ASF
Domain : Structural Engg. & Designing
Role : Product Test Engineer
Tools : TFS, ALM, Visual Studio, ADO(Azure Devops)
Duration : Dec 2019- Till Date

Description:

ASF stands for AVEVA steel fabricator, which is a globally leading steel fabrication management web-based application with integrated estimating, drawing management, material management, production control, report management and shipping software automates the steel fabrication process. Our software is designed by steel fabricators for steel fabrication and is proven to help increase revenues, reduce costs, improve quality and shorten project schedules.

"BOCAD" is a steel structural designing and detailing application having the ability to create the design outlook of a steel structure which can be either in onshore or offshore. The application uses the robust mechanism to create various kinds of profile members in every physical point of the entire structure with it's complete detailing process and helps to generate the respective 2D & 3D drawings in a very concised way. Due to this diverse expansion of designing process, customer becomes able to view it's own structure in a very detailed way even before establishment of the real model. Along with the same, using this application customer can also get the entire information of cost and expenditure of his assumed project in a very detailed way before turning his projected action towards fabrication and erection.

Project#2:

Project Name : BooktoPoint
Client : Wordery
Domain : E-Commerce
Role : Software Test Engineer
Tools : Selenium WebDriver, Grid, Apache POI
Browsers : IE, Firefox, Google Chrome
Defect Management Tool: TFS

Description:

"BooktoPoint" is a web-based application which is no means of different from online shopping application where, there is the flexibility to the students by easy accessing their searched books at their end. The application is comprised with different business activities like customer, order, shipping, seller management and payment. The application provides a smooth way of searching location for serviceability and based on which customer order gets generated and further a sense of easy business gets developed between customer and seller. The application provides a comprised solution of developing a new business in a very efficient and effective way by managing the easy maintenance of data through it.

Roles & Responsibilities:

- Analyzing and understanding the business requirements.
- Executethetestcasesanddevelopthetestscriptsbyusing**seleniumwebdriver**and**java**in **Eclipse**.
- Writing the test class methods using **TestNG**.
- Automated test suites using **data driven** and **keyword driven** framework (**Hybrid Framework**).
- Used **Apache Poi** for automating the test execution by handling the excel related operations in a very effective and efficient way.
- Used **Maven** for building the WebDriver project. Integrated with Continuous Integration tools **Jenkins** for running test on nightly basis automatically.
- Running the scripts on Different Browsers through xml Using **TestNG**.
- Used the **cucumber framework** for having a smooth interaction between client and the technical team.
- Created **Data Driven** tests that randomized the test data for testing the AUT using Excel file.
- Generated the test case wise execution report using tool **Extent Reports** in **HTML.**
- Identified and reported bugs using defect tracking tool **HP ALM** and presented bug reports for weekly status updates.
- Performed **smoke, functional and regression testing** utilizing automated test scripts.
- Participated in weekly status meetings with the team, developers to discuss open issues.
- Defects encountered during regression Test and follow-up with developers Until all Issues were resolved.
- Involved Daily Scrum meetings and Sprint review meetings.

Project #3:

Project Title	: Shape Society
Client	: Plan international
Technologies	: Java, SQL Server2005.
Role	: Test Associate.
Testing Tools	: Manual Testing.

Description:

It is a web based application designed for funding the money and sponsoring different welfare program across the country for uplifting the life of the small children those who are coming across many atrocities happening in the country. Basically the application acts like a NGO and provides the opportunity to the people by donating the money for these kids by the means of basic needs, education and security of their life.

Here the application contains 4 fundamental modules like 1.admin (Having the access to provide the information about the past program, ongoing program, photo gallery of the respective program, information about the sponsored and sponsoree), 2. Children registration,3.Donator Creation, updation and deletion, 4. Payment Module.

Roles & Responsibilities:

- Understanding the requirements and business of the application.
- Involved in functional requirements and design discussions of the project.
- Creating Test Scenarios, Test Cases, Test data for the application based on the requirement specification document.
- Maintained test data in Excel sheet.
- Performing Manual Testing on functionality of the application.
- Testing activities included smoke **testing, sanity testing, Retesting, Regression testing** and **integration testing.**
- Reported the bugs using the bug tracking tool **Jira**.
- Updated test cases and test plans periodically to manage changes in requirements.
- Executing Test Cases and Generating Test Summary Reports.
- Generation of daily and weekly status report.
- A close interaction with developers regarding defects, participated in tracking, reviewing and analyzing bugs.

Personal Profile:

Name : Snehashis Das
Nationality : Indian
Gender : Male
Language Known : Oriya, Bengali, Hindi, English
Permanent Address : Balasore, Odisha

Declaration:

I hereby declare that the above-mentioned information is true and correct up to my knowledge and bear the responsibility for the correctness of the above-mentioned particulars.

Place: **(SnehashisDas)**
